

CHRONOS DIVIDE

3 LEVEL PLATFORMER GAME

OVERVIEW

Genre: Narrative and Combat-Driven Puzzle Platformer

Perspective: 3D Level Platformer Game

TRAVERSE THE RIFT

Explore landscape, parkour through obstacles

HARVEST FRAGMENTS

Collect coins to gain health, mana and unlock the power to shift between worlds

COMBAT

Fight enemies with swords and abilities which upgrade upon level completion

RESTORE THE BARRIER

Collect the orbs to repair the Guardian's barrier

Playtesting & Learnings

Level 1

Town Square

Traversal Art

PARKOUR

The Art of Evasion: Use parkour skills to escape and avoid dangers you aren't ready to fight yet.

The Divine Guidance: The Mother Goddess reveals the Town Square vision and the power of dimensional shift.

The dimensional shift: This "SHIFT" lets you move instantly between the Roman Illusion and the Demonic Reality.

The Town Square: The Town Square is a climb through the old town, where the First Orb and the SWORD awaits.

Level 2

Church

Weapon Unlocked
SACRED BLADE

The Blade Unleashed: Acquiring sword gives the guardian a whole dimension to attack.

Collapse of the Sacred Hall: The Church has fallen. Fight against a rising army of flying enemies.

The Sanctum's Heart: Deep within the fallen Cathedral, the Second Orb awaits.

Valley of Vines: Traverse through the Valley across the lake, to reach the Museum Gate.

Level 3

Museum & Dungeon

Unlocked:

IGNIS DIVINUM

Museum Door: Defeat the enemies ahead to unlock the museum door.

The Army Fight: Eliminate the final physical enemies inside the museum.

Dungeon: After the longest struggle, reach the dungeon to face your toughest enemy.

Final Platformer: Defeat the FINAL BOSS! by stepping on the Green Platforms.

Playtesting & Learnings

Level Design Workflow

Paper Design

Established pacing loops: Combat Arena → Parkour → Puzzle

Mapped out narrative progression and "Chrono-Duality" puzzle zones on 2D layouts before touching the engine

World Building

Optimized assets from external libraries for Unity, ensuring high fidelity without performance loss

Curated and modeled 3D assets that strictly adhere to the "Ancient Roman" vs. "Demonic" style guides

Greyboxing

Tested jump distances and wall-run heights to match player physics.

To improve accessibility and overall gameplay, checkpoints have been implemented

Art & Lighting

Contrasting the atmosphere of both the realms and merging all the game mechanics together.

Contrasting the atmosphere of both the realms and merging all the game mechanics together.

Game Pillars

Playtesting & Learnings

Game Pillars

Chrono Duality

- Seamless shifting between the **Idyllic Roman Past** and the **Demonic Present**
- Experience Narrative Depth through two parallel worlds simultaneously; every ruin in the present tells a story of the past
- Shifting is not free. **Strategic use** of **Collectibles** fuels your ability to traverse dimensions

Ancient Odyssey

- Journey through **diverse biomes**, ranging from vineyards, to waterfalls and claustrophobic caves
- Traverse the **Roman Town Square**, **Church** and **Museum** as they crumble into demonic nests

Kinetic Mastery

- Fluid **parkour** movements, **Jumps**, **Double Jumps**, and **precision vaults**
- Crisp player movement built on top of Unity's built-in Physics engine

Playtesting & Learnings

Playtesting & Iterations

Duality Confusion:

- **Issue:** Players often forgot to Shift at dead ends, getting stuck.
- **Fix:** Added subtle environmental storytelling on cross-dimensional objects. This visual cue prompts intuitive shifting without needing text tutorials.

Combat Readability:

- **Issue:** Players spammed buttons, unsure if Magic Abilities triggered.
- **Fix:** Added distinct Sword Trails and charge-up animations to visually confirm Magic vs. Physical strikes.

The "Vine" Dead-Ends:

- **Issue:** In Dungeons, players wasted time attacking indestructible vines..
- **Fix:** Tied vines to Chrono-Duality. They now only exist in the Demon Realm, forcing a Shift to bypass them.

Insights

Evolving the Threat:

- Combat requires escalation. We scaled Demon AI per level to demand mastery.

Prioritized on Game Feel:

- We implemented "Coyote Time" and Air-Control for Double Jumps to make movement feel fair and fluid.

Players regenerate on falling:

- We implemented Instant Regeneration upon falling, keeping the player locked in the high-octane "Flow State" essential for the game.
